

# OMA LOGISTICS TOGO

Freight management and supply chain solutions throughout Togo  
and across borders to the hinterland countries.

## AIRFREIGHT

Importers and exporters of time-sensitive or perishable goods, ship's spares, transit shipments or temporary imports need an experienced team with local expertise in Togo.

OMA Logistics Togo is ISO 9001:2015 and 14001:2015 certified which is audited annually - this commitment to compliance and transparency is essential for clients operating in international markets.

All Airfreight coming into Togo travels through **Aéroport International Gnassingbé Eyadéma in Lomé**.

In 2018 we handled over 160 shipments each month on average, representing a total of 12,500 kgs.

### OUR SERVICES INCLUDE:

- ◆ Direct IATA flight services
- ◆ Worldwide consolidations
- ◆ Dangerous goods service
- ◆ Customs clearance and door delivery
- ◆ Customs bonded warehousing transit shed

## SEAFREIGHT

In our modern, speed-driven and globalised economy, some 90% of all cargo travels as always has done; by ship.

If part of your supply chain involves sea freight, we can arrange door to door shipments through our global partners to and from anywhere in the world.

Our long experience and excellent relations with customs ensures your goods are cleared promptly & efficiently.

### OUR SEAFREIGHT SERVICES INCLUDE:

- ◆ FCL (Full container load) shipments
- ◆ LCL (Less than container load shipments) deconsolidation with dedicated warehousing Breakbulk services
- ◆ ISO tanktainer services
- ◆ Handling and delivery of hazardous cargoes
- ◆ Supply chain contracts
- ◆ Cross border movements throughout West Africa (including out of gauge cargo)
- ◆ Customs clearance and door delivery on DDU or DDP basis
- ◆ Warehousing, distribution and delivery services
- ◆ Document handover and cargo release

## TOGO SHUTTLE AND TRANSPORT

We offer a mix of owned and partner transport solutions. Our light vehicles operate within Lomé city limits offering small parcel delivery services, to and from air and seaports. We offer long haul solutions within Togo, and to and from Burkina Faso.

## SHIP'S SPARES IN TRANSIT

When a main engine breakdown means a vessel requires spare parts urgently, expertise in both shipping and logistics is essential. Equally, having an efficient supply chain for routine maintenance, spares and equipment is essential to minimise vessel delays in port.

OMA Logistics Togo offers shipowners, charterers and management companies a door-to-deck or door-to-port delivery service for ship spares and marine parts.

We understand the importance of timely delivery and have the in-depth knowledge of how these shipments need to be documented, handled and despatched to vessels to comply with the local customs regulations.

We can advise on transit times and the best mode of transport, arrange collection from the airport (or port), efficient customs clearance and delivery to the vessel alongside or offshore as required.

Our experienced team will give you a clear breakdown of expected costs and up to date information on when the delivery will be made.

We can also offer warehousing and storage if needed for future shipments, or a temporary space to keep items in a secure location.

## PROJECTS AND CROSS BORDER TRANSIT SERVICES

Any cargo that is too large, too specialised or just too tricky for regular transport, needs a team that knows the pitfalls, and understands what's needed in order to ensure a smooth and expeditious transit.

This is especially important in West Africa where the final delivery site may be many miles from the port, along unmade roads and perhaps across borders into the landlocked countries.

Our dedicated team regularly arranges the safe handling of shipments throughout Togo and across borders into Burkina Faso and can service any type of project, whether the cargo is heavy lift, out of gauge, break bulk or containerised shipments.

We have first class transport operator insurance cover with the TT Club for extra peace of mind.

## WAREHOUSING

We operate two bonded warehouses - our main warehouse located in our office complex has 1,600 m<sup>2</sup> and a second warehouse nearby has 2,400 m<sup>2</sup>. The latter also has an additional 2000 m<sup>2</sup> of open and 200 m<sup>2</sup> of covered storage. Both warehouses have excellent connections to Lomé city centre and surrounding areas.

Our warehouse operators are fully trained to meet the highest HSSE (Health Safety Security & Environment) standards.

We can offer **smart warehouse** solutions at an additional cost to allow full stock management and delivery services matched to your requirements.

**This facility offers secure storage and inventory control for the following industries:**

- ◆ FMCG (Fast Moving Consumer Goods)
- ◆ Pharmaceuticals
- ◆ Electronics
- ◆ Retail
- ◆ Spare parts
- ◆ LCL cargoes
- ◆ Consignment stock
- ◆ Supply Chain logistics

**We offer managed solutions on behalf of clients for:**

- ◆ Bulk cargoes
- ◆ Project shipments
- ◆ General goods storage

## LCL

We offer LCL deconsolidation services to all our clients and are proud to be the partner agent for world-leading NVOCC service providers Saco Shipping GMBH. Through our network of global agents, we can arrange the import and export of LCL shipments to and from virtually anywhere in the world.

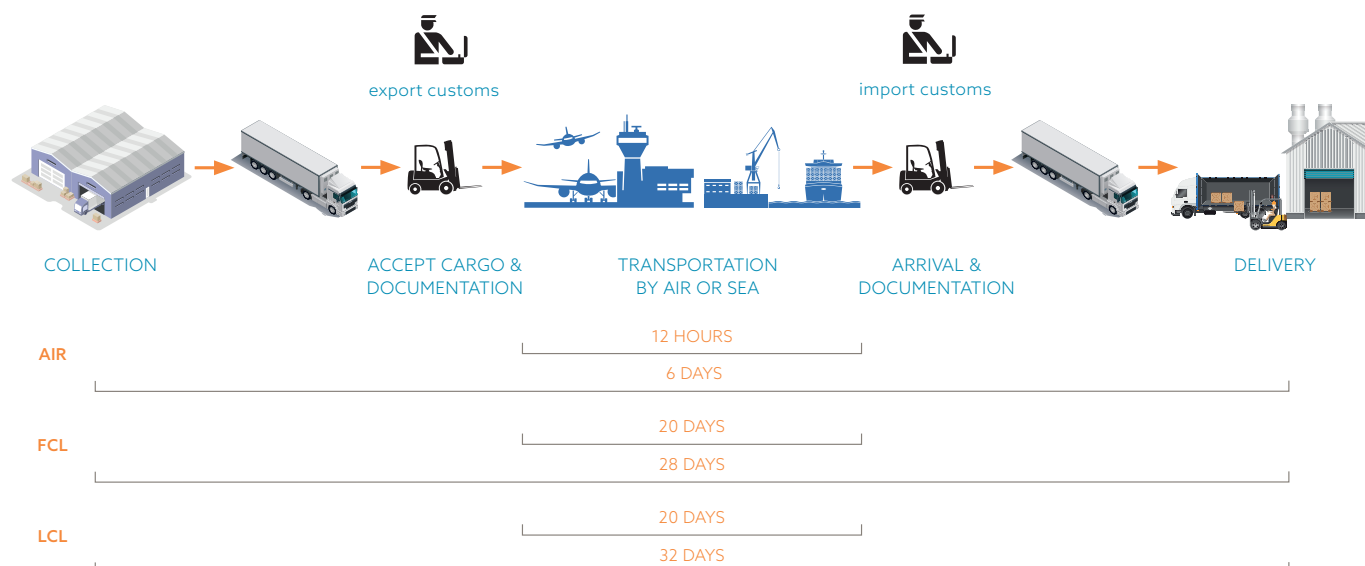

For smaller shipments, Less than Container Load (LCL) or groupage is an excellent cost-effective alternative to airfreight. Transit times for LCL can be surprisingly fast (Europe to Lomé is around 21 days) which means that often the customer's delivery time-scale can be met with all the security of container shipping, but without the high cost of airfreight.

Once the container arrives in port, we handle the transfer, warehousing and storage, de-consolidation of the containers and liaison with clients for final onward delivery or collection.

## INTERNATIONAL FREIGHT MANAGEMENT

Local freight management is proving to be extremely popular with our growing base of local clients as it enables them to dictate the priority of the shipment and control the costs. The ability to pay in Togo is also a significant factor saving time and cost.
